Dear Sir,

Subject: Presentation of your products

We are a Web Development and Multimedia Solutions Company. We specialize in designing for engineering products and services. Our department includes Creation of Multimedia CD Presentations, Web Designing, Web Hosting, Domain Registration, Search Engine Optimization, Banners & Logos.

Our recent completed project includes a contract with **Oswal Valves (P) Ltd.** for creating the following:

PRODUCT: INDUSTRIAL VALVES

- **Website designing**
- **Multimedia CD Presentation for products**
- **Designing for Product Catalogues**
- **Company Leaflet / Pamphlet**
- **PDF Files (widely used on the internet)**

Apart from making websites, which has the benefit of being viewable online anytime, we also make Multimedia CD Presentations, which will show products catalog, prices, company profile, contact info and any other information that you would like to add. The main features include animation and sound effects!

Product Catalogues and Pamphlets are made such, that they can catch the users attention and let them know your product details at a glance.

PDF files, are used on the Internet for sharing and distributing information with the people who visit your website or it can be simply send as an attachment through email. The main feature is that they are in a readable format & can include coloured images and unlike a Word Document the text in it cannot be changed or copied.

Thanking you,

For ABH INFOTECH

Abhinav Jain
